

SO-QSFP-4SFP-ACUxM

QSFP to 4xSFP+, DAC, AWG30, 3m to 15m, active

OVERVIEW

The SO-QSFP-4SFP-ACUxM are QSFP to 4x SFP+ splitter cables offering IT professionals a cost-effective interconnect solution for merging 40G QSFP and 10G SFP+ enabled host adapters, switches and servers. These cables use a 37-position connector with active circuitry to increase distances and to improve EMI and reduce signal loss. For typical applications, users can install this splitter cable between an available QSFP port on their 40 Gigabit/s rated switch and feed up to four upstream 10GbE-SFP+ enabled switches. Each QSFP-SFP+ splitter cable features a single QSFP connector (SFF-8436) rated for 40-Gb/s on one end and (4) SFP+ connectors (SFF-8431), each rated for 10-Gb/s, on the other.
