

SO-SFP-10GE-ACUxM

SFP+, DAC, AWG30, 1m to 15m, active

OVERVIEW

The SO-SFP-10GE-ACUxM direct copper cables (DAC or Twinax) are suitable for very short distances and offer a highly cost-effective way to connect within racks and across adjacent racks. SFP+ Cables is a low cost SFP+ solution. SFP+ directly attached Twinax cable assemblies support 10 Gigabit Ethernet, 10 Fibre Channel, and other industry standards. SFP+ Active copper cables use class Clock and Data Recovery (CDR) technology to support longer distances than standard passive SFP+ Direct Attached Cables. They are compliant with SFF-8431, SFF-8432 and SFF-8472 specifications. Smartoptics offers 10G SFP+ Passive Cables in lengths of 1 to 15 meters.
